" Industry 4.0, a step toward Just Transition "

By Mohamed Ageez

Workshop Brief:

The "Industry 4.0: A Step Toward Just Transition" workshop is designed to explore the intersection of advanced technologies and sustainable development within the context of the fourth industrial revolution, often referred to as Industry 4.0. This workshop seeks to address the imperative need for a just transition, ensuring that the adoption of Industry 4.0 technologies does not exacerbate inequalities and environmental challenges but rather contributes to a fair, inclusive, and environmentally responsible future.
